Orientierung

Attention!

- Provisional stop of admission at Le⁺O
- Distribution outlets keep working
- But with smaller food packages
- Information about other offers of help

We ask for your understanding!

Dear Le+O guests!

Le+O gives donations, Le+O does not offer primary care!

Le+O is a **donation project**. Most of the foodstuffs distributed here are donated. It is often foodstuffs from supermarket and has been **saved from being thrown away**, i.e. the bread is from a day before, the vegetables are not fresh from the field and the pasta has already expired.

Le+O can only distribute what is available. More people in need mean smaller food packages for everyone!

Demand has increased significantly in recent weeks. **The packages distributed by Le+O have almost doubled**. Three more distribution outlets were opened within a very short time. However, the foodstuffs donations are not enough to cover the increased demand. That's why the size of the packages given out has become smaller, **so that everyone gets something and nobody goes away empty-handed**.

A provisional stop of admission is necessary!

No new clients can be accepted at the moment, i.e. **registration as a Le+O guest is not possible for the time being**. We are working flat out to increase our capacity.

What options do you have now?

If you are not yet registered with Le+O, please visit other **social markets**. Here is an overview of all markets available in Vienna:

Vienna's social markets

Take a photo with your mobile and open the URL.

We ask for your understanding.

If you are already registered with Le+O, we ask you not to come to our distribution outlets **without an appointment**. The appointment is necessary in order to be able to provide enough foodstuffs.

If you are upset because you received less today than you did a few weeks ago, please keep in mind: the people who work at Le+O are volunteers. They do this without salary and without anything in return. They are people who just want to help.

Thank you!
